# DEDICATED HOSTS
High Performance Dedicated Cloud Hosting

Dedicated Hosts are private computing nodes that are fully dedicated to a single customer's use, with no shared resources or noisy neighbors. This service is ideal for any customer that has a growing need for powerful infrastructure, security, compliance, or is looking for the flexibility and cost-effectiveness that comes with having their own computing infrastructure.
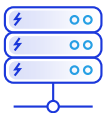

Fully Dedicated Cloud Computing
Take advantage of a fully dedicated and private environment, with no shared resources with other customers and no noisy-neighbor issues.
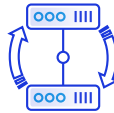

Private and Public Cloud
Within seconds, launch Cloud Servers backed by highly available infrastructure on your Dedicated Hosts or our Public Cloud, depending on your project needs.

Blazing Fast Storage
All of our Dedicated Hosts are powered by enterprise-grade SATA SSDs or NVMe SSDs, providing blazing fast performance for your servers and applications.

Highly Available Infrastructure
Our highly available infrastructure stands ready to accommodate hosting projects of any scale and size. Backed by a 100% up-time guarantee, our Dedicated Hosts give you the ultimate peace of mind.

DEDICATED HOSTS FEATURES

Redundant RAID Storage
Our highly redundant RAID architecture ensures that your servers and apps stay up and running even when components misbehave.

Manage RAM, CPU, and Disk
View and manage all RAM, CPU, and disk space in use on your Dedicated Cloud Node at a glance from the Cloud portal.

Compliance Ready
Secure and ready to help you address and meet your compliance and regulatory requirements.

Bring Your Own Software Licenses
Reduce costs by using your existing server-bound software licenses.

Provision Any Plan
Freedom and flexibility to provision any plan type.

Manage Your Servers
Complete control to create, manage, and remove Cloud Servers on your Dedicated Cloud Node.

Optional Backup and Replication
Secure backup and/or replication is available.

Metrics Graphs
View usage metrics graphs for all your Cloud Servers on your Dedicated Node.

Powerful Control Panel
The intuitive, easy-to-use, and secure control panel enables you to create and manage cloud virtual servers, snapshots, SSH keys, private and public IPs, DNS records, and more, all in one place.

Scalable
Start with the resources that are the right size for today and seamlessly migrate your live Cloud Servers to more powerful Dedicated Hosts to support your future growth.
