ATLANTIC.NET CLOUD PLATFORM:
MAKING ACP HIPAA COMPLIANT

WHAT IS ACP CLOUD?

ACP Cloud is a cloud hosting platform that has been built from the ground up with security, compliance, and performance in mind. All ACP Cloud systems are enterprise-grade hardware with redundancy built-in. Some features include:

- User-Friendly Control Panel
- SATA SSDs, NVMe SSDs
- Always Available Support 24x7x365
- Comes with a 100% Uptime SLA

WHAT CLASS-LEADING FEATURES DO YOU GET FROM ACP?

- Compute with RAID Storage
- Fully Managed Services Available
- Tier 1 Carriers, Redundant Full Stack Networking
- Windows, Linux, or FreeBSD Servers
- One-Click Hosted Applications
- Encryption at Rest by Default
- Physical Security Controls
- Audited and Certified Data Center Hosting in Seven Locations

HOW TO MAKE ACP HIPAA-COMPLIANT?

ACP can implement multiple managed services to make HIPAA-Compliance much easier to achieve. To make this happen, you may need the following.

- Atlantic.Net can work with you to conduct a Risk Assessment to understand if PHI is in-scope
- Atlantic.Net HIPAA-Compliant Managed Cloud Services
  - Fully Managed Firewall
  - Intrusion Prevention Service
  - Anti-Malware
  - Vulnerability Scans
  - Patch Management
- A Signed Business Associate Agreement (BAA)

NEED ALTERNATIVE SERVICES?

Atlantic.Net also provides Dedicated Cloud Hosts, Bare-Metal Dedicated Servers, and Server Colocation. We can provide a dedicated cloud host or a bare-metal dedicated server, set up a secure Firewall, and sign the Business Associate Agreement for an alternative option with a more dedicated and scalable solution.

ATLANTIC.NET CLOUD PLATFORM:
MAKING ACP HIPAA COMPLIANT

CELEBRATING 29 YEARS OF EXCELLENCE

Remember: You Are Responsible for the Integrity and Security of ePHI

These additional services will help you meet this objective and are all available as additional Managed Services from ACP:

INTRUSION PREVENTION SYSTEM (IPS)

1

This solution features a customizable security infrastructure that allows our engineers to tweak it to your specific needs. Threats are monitored and prevented in real-time; the IPS works with the Managed Firewall by inspecting packets that the firewall has already accepted as legitimate.

MULTI-FACTOR AUTHENTICATION (MFA)

2

In conjunction with a strong password policy and secured VPNs with encryption, MFA is the defacto choice for securing all computer assets. With a managed service, MFA can easily be set up at scale, and MFA authentication software can be distributed to users.

SERVER MANAGEMENT

3

This ever-popular add-on empowers each client to focus on their business while our technical teams monitor and manage the server 24x7 to ensure the system is running well. We can manage CPU, disk, memory, database services, DNS, email services, deployments, file sharing, and so on. Check out our scope of services page for the full breakdown.

VULNERABILITY SCANS

4

This critical service is part of the Server Management service and is designed to scan and interact with your environment, looking for unknown weaknesses such as those found in software, application configurations, or operating system security holes. Continuous updates are the number one method of protection against data breaches, and the vulnerability scan will tell you of known weaknesses so you and Atlantic.Net can get them patched.

TREND MICRO DEEP SECURITY

5

Anti-malware is a required element for HIPAA; Atlantic.Net can provide Trend Micro Anti Malware if you do not currently have your own solution.

CELEBRATING **29** YEARS OF EXCELLENCE

ADDITIONAL MANAGED SERVICES

Want to free up your valuable time and bring focus to more important tasks to achieve your business objectives? Our experts are ready to help with optional managed services. This is how we add additional layers of managed security services to further optimize and secure your HIPAA-Compliant hosted solution on our public cloud.

- Managed Veeam Backup Service
- Offsite Backups and Replication
- Network Edge / DDoS Protection
- Consultancy Services

HIPAA-Compliant Hosting Checklist

The core considerations of HIPAA for any companies working with electronic medical records are privacy and security. The HIPAA Privacy Rule and Security Rule are what you need to be concerned with if you are getting certified (unless you are a health insurance company or similarly provide healthcare plans), and they are the same HIPAA-Compliant hosting requirements you should consider in a web hosting company.

Private Hosted Environment · SSAE Certification · Business Associate's Agreement · Multifactor Authentication · Firewall · Offsite Backups · Encrypted VPN · SSL Certificate SSL VPN

FREE UP YOUR IT RESOURCES AND
SAVE BIG!

For over 25 years, we've helped thousands of organizations with industry-leading hosting solutions, and we will do the same for you!

Our certifications showcase our expertise and tenacity in maintaining the best HIPAA-Compliant Cloud environment. We hold SOC 2 and SOC 3 certifications and we are HITECH and HIPAA-Compliant Audited.

Simple Signup Process

You can start your HIPAA Journey right now by emailing **Sales@Atlantic.net**. If you have any questions, please get in touch! Contact an advisor at **888-618-DATA (3282)**
